About

Full stack engineer with 4+ years of experience building and maintaining web platforms used by real end-users. Comfortable working across the stack, from REST API design and database modeling to React based UI and experienced in fast moving, cross-functional teams. Worked on a platform deployed to schools and educational institutions across Portugal, which gave me first hand exposure to the challenges of building reliable, user facing products in an education context. Passionate about writing clean, maintainable code and growing through an environment team setting.

Professional Experience

Celfocus | Fullstack Engineer

Mar 2024 - present • Porto, PT

- Working across backend and frontend on multiple concurrent client projects, adapting quickly between different codebases, tech stacks, and business domains.
- Building and maintaining Salesforce backend logic (Apex / Java) and frontend interfaces (JavaScript(LWC), HTML/CSS) for enterprise clients with high reliability requirements.
- Developing Java micro-services with REST API interfaces; integrating external APIs and ensuring smooth deployments through troubleshooting and staging validation.
- Collaborating in cross-functional teams across engineering, QA, and client stakeholders, translating requirements into working, well-tested features.
- Supporting CI/CD pipelines and contributing to code reviews, promoting readability and consistency across the team.

AlticeLabs@UA | Backend Developer - Research Grant

Mar 2021 - Nov 2023 • Aveiro, PT

- Core developer on CAMPUS — a multi-platform digital ecosystem deployed to schools across Portugal, functioning as a collaborative resource sharing network for teachers and students.
- Built and maintained REST APIs consumed by web clients; designed relational (MySQL) and NoSQL (Neo4J, MongoDB) data models for user generated content at scale.
- Developed frontend interfaces in React integrated with the backend APIs, contributing to the full feature lifecycle from design to deployment.
- Handled Linux server administration, system architecture decisions, and deployment pipelines in an Agile team environment.

Technical Skills

Frontend

React · JavaScript/TypeScript · HTML · SCSS · Redux

Backend

Node.js · REST APIs · Java · MVC · PHP · Apex · Spring Boot · Service Brokers · OOP

Databases

MySQL · MongoDB · Neo4J

Infrastructure

Git · CI/CD · Linux SysAdmin · Docker

Others

Salesforce · UX Design principles · Figma · Agile/Scrum

Education

Master's - Communication & Web Technologies

University of Aveiro

Oct 2021 - Dec 2023

Bachelor's - New Communication Technologies

University of Aveiro

Sep 2018 - Jul 2021

Certifications & Awards

Salesforce Certified Platform App Builder	Jul 2024
Aveiro Tech City ACADEMIA Challenges - Award Winner NOSSA! Project	Jul 2022
Elements of AI - University of Helsinki	Apr 2021

Others

Programming Mentor - AVILA Crew (Mar 2021 - Jul 2023)
Mentored university students in databases and server-side technologies

Languages - Portuguese (native) · English (C1)
